Practical# 04 Jenkins Pipeline to Pull Docker Image & Run Container

Objective

To create a Jenkins pipeline that pulls a Docker image from Docker Hub and runs it as a container.

Prerequisites

1. Jenkins installed and running 2. Docker Desktop installed and running 3. Git installed 4. Basic knowledge of Jenkins pipeline

Step 1: Verify Docker Installation

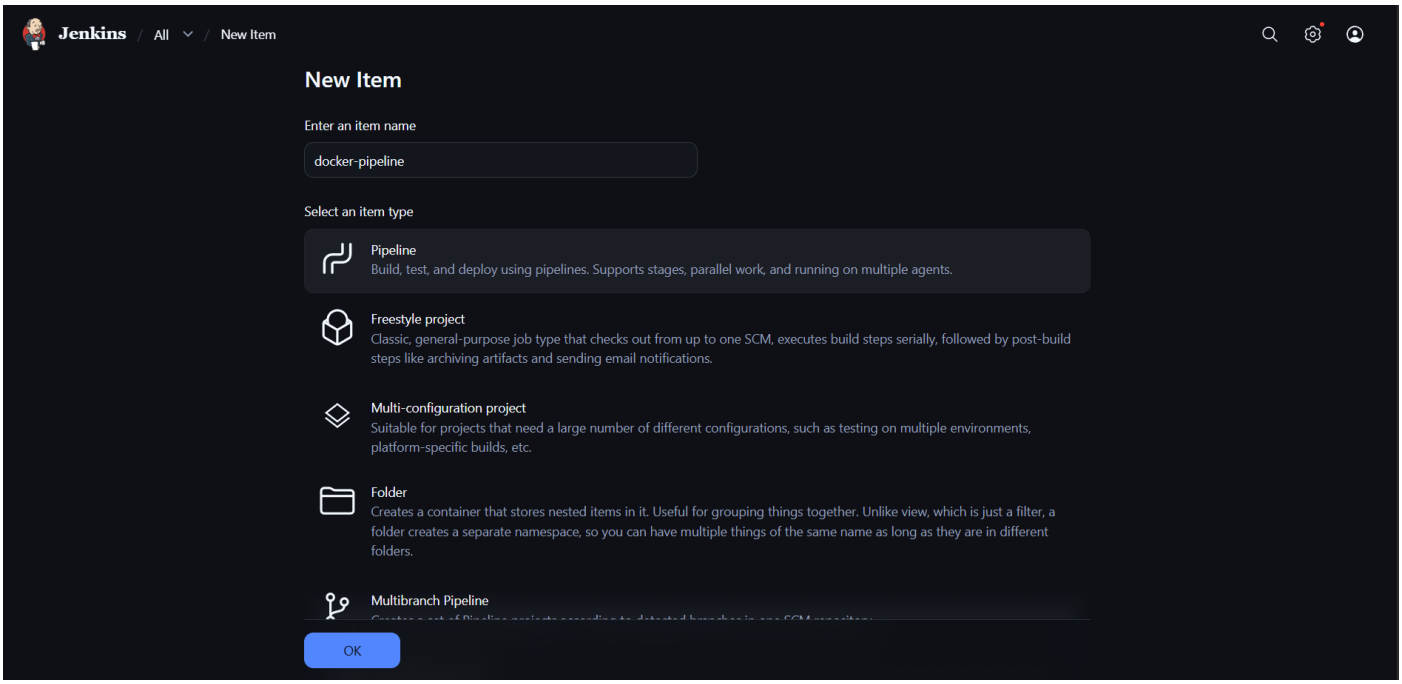
Run the following command in Jenkins or system terminal:

docker --version

docker ps

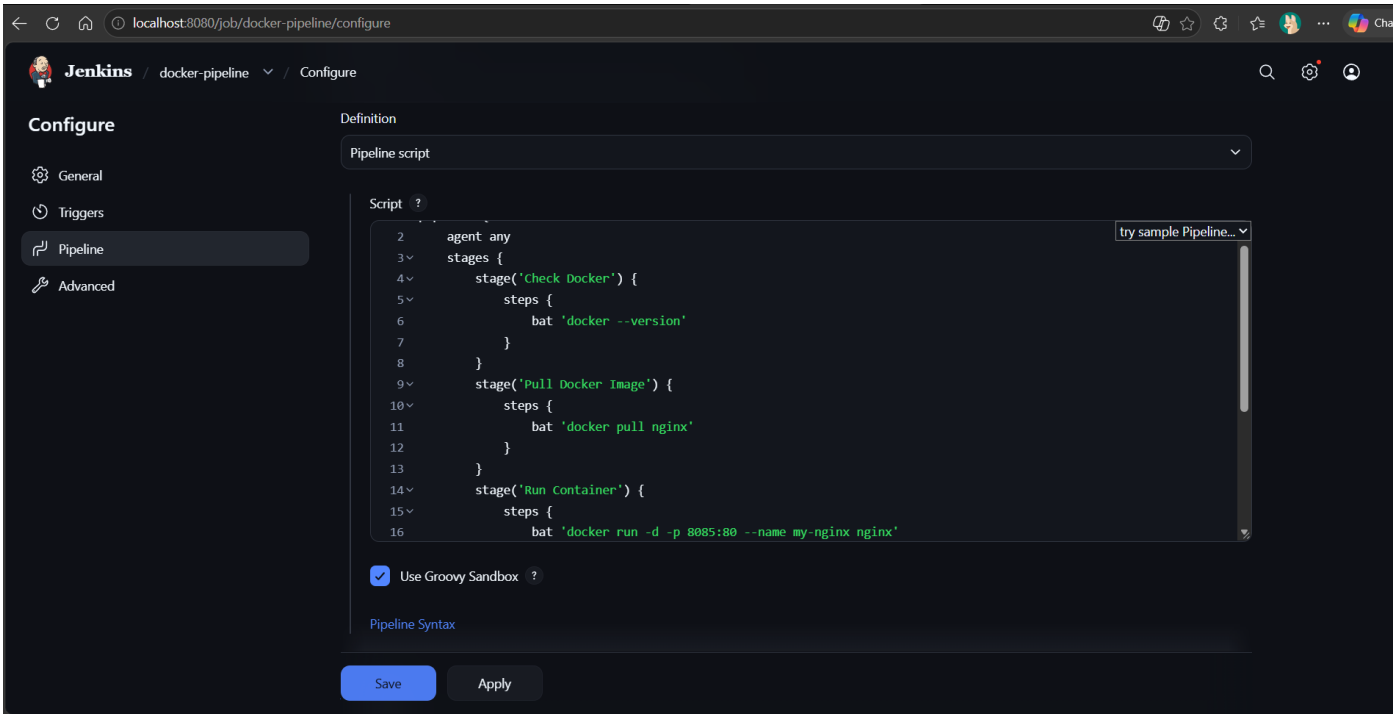
Step 2: Create Jenkins Pipeline Job

1. Open Jenkins Dashboard 2. Click on 'New Item' 3. Enter name: docker-pipeline 4. Select Pipeline 5. Click OK



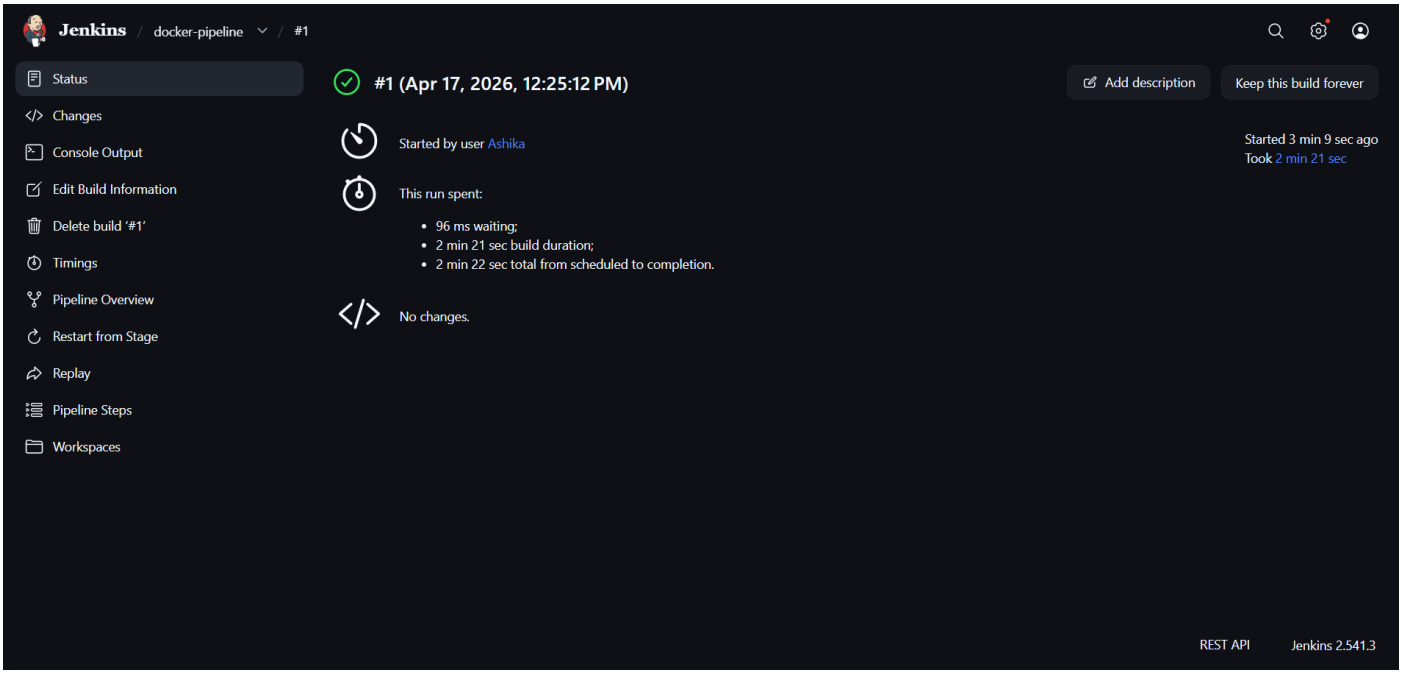
Step 4: Add Pipeline Script

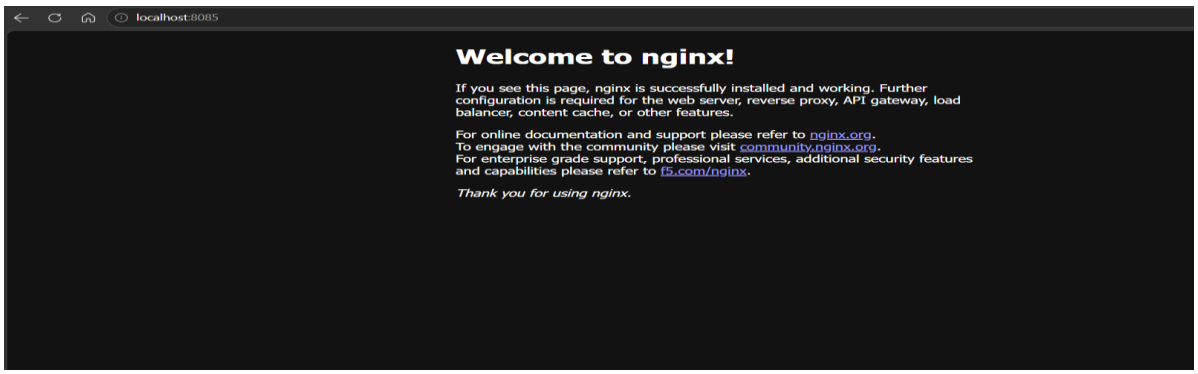
Write the content in the Pipeline Script inside it and then save it



Step 5: Run the Pipeline

Click on 'Build Now' and observe the pipeline stages.



Step 6: Verify Output


Open browser and go to: http://localhost:8085
