Simple Jenkins Pipeline Practical-01

To create and run a simple Jenkins pipeline without using Git or Docker.

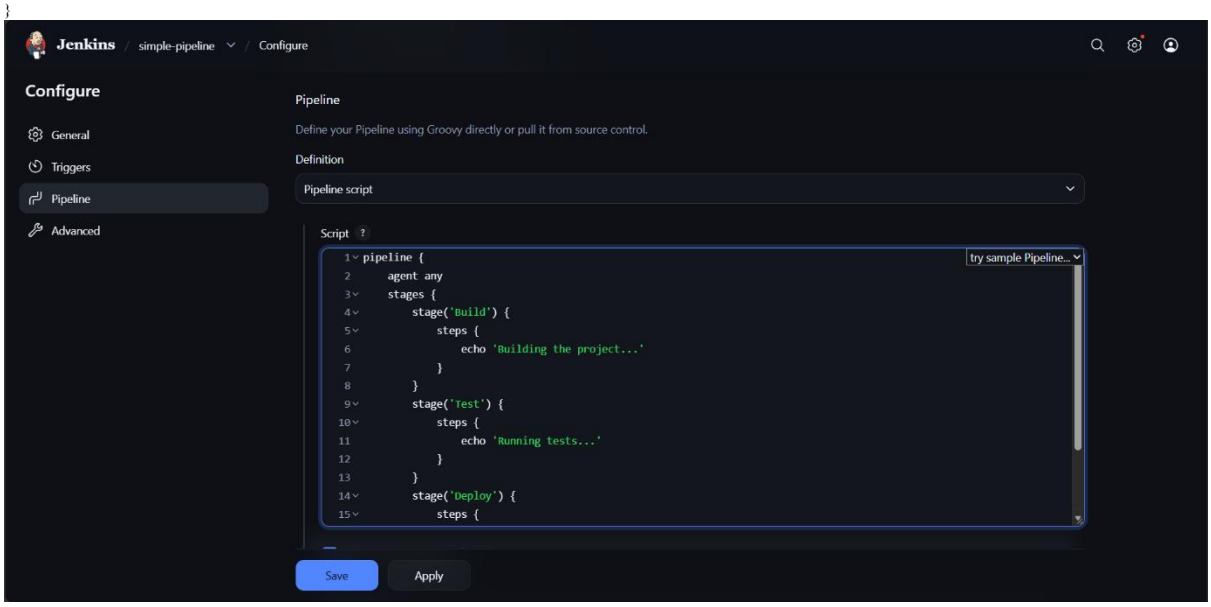
Step 1: Open Jenkins Dashboard

Open your browser and go to http://localhost:8080 and login to Jenkins.

Step 2: Create a New Pipeline Job

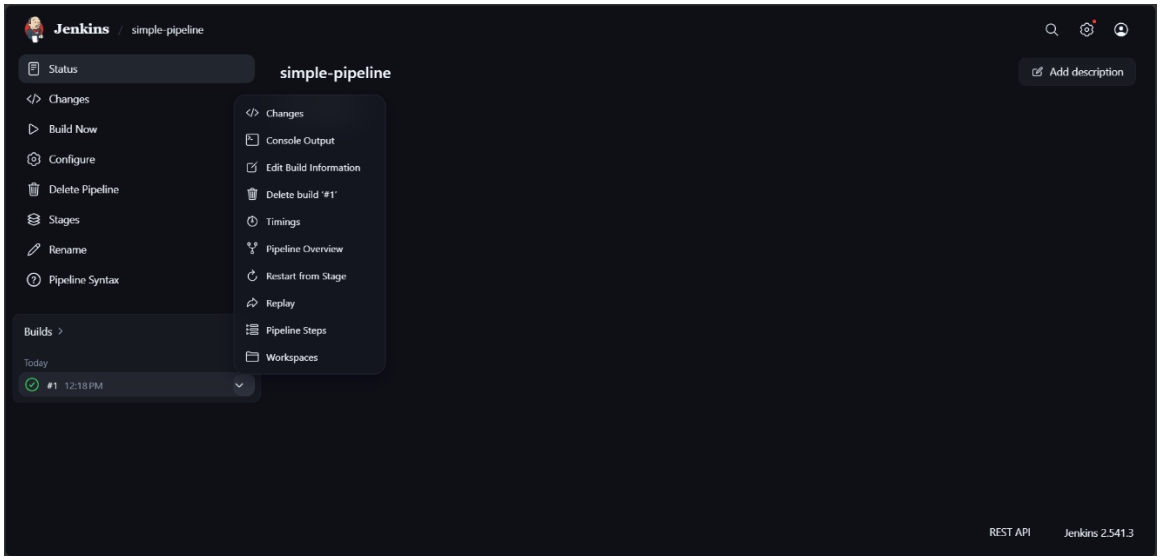
1. Click on 'New Item' 2. Enter job name: simple-pipeline 3. Select 'Pipeline' 4. Click OK

```
pipeline {
  agent any
  stages {
    stage('Build') {
      steps {
        echo 'Building the project...'
      }
    }
    stage('Test') {
      steps {
        echo 'Running tests...'
      }
    }
    stage('Deploy') {
      steps {
        echo 'Deploying the application...'
      }
    }
  }
}
```



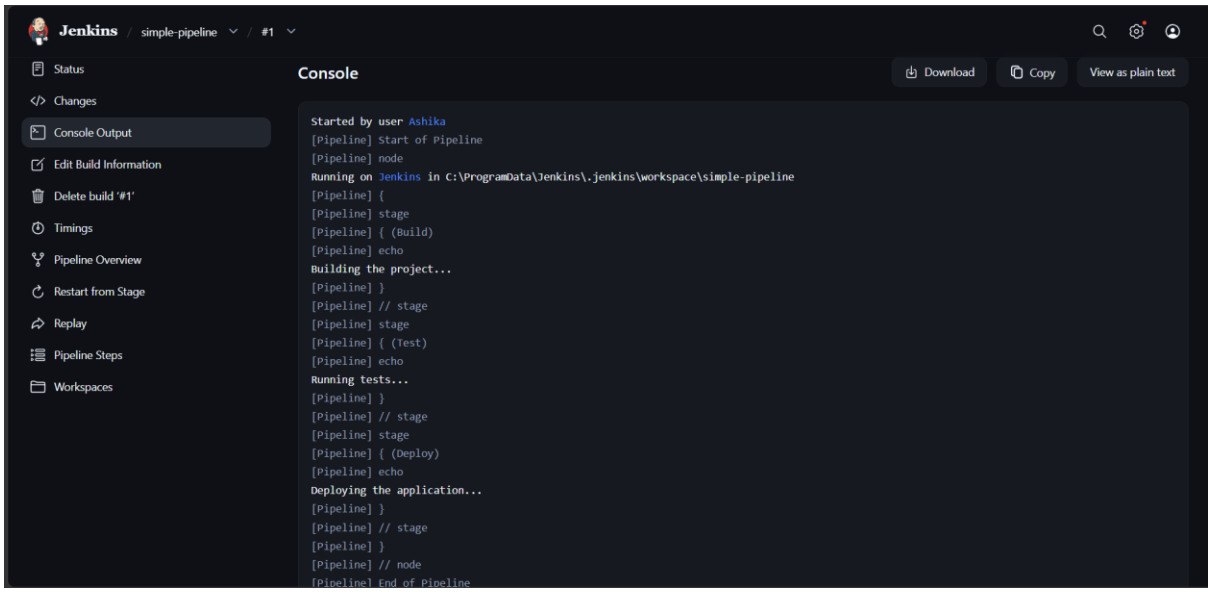
Step 3: Configure Pipeline Script

Scroll to Pipeline section and select 'Pipeline script', then add the following code:



Step 4: Save and Run Pipeline

Click on 'Save' and then click on 'Build Now' to run the pipeline.



Step 5: Observe Output

Click on the build number and open 'Console Output' to see execution logs.

Expected Output

All stages (Build, Test, Deploy) should execute successfully with messages displayed.

Conclusion

Successfully created and executed a simple Jenkins pipeline.
